

ASSEMBLY INSTRUCTIONS

47" or 54" snowblower Chute Rotator Kit

1) Open packaging and inspect to ensure contents are complete as shown below:

#1 Rotator
Assembly

#2 Base Plate

#3 Base

#4 Main Shield

#5 Chain Shield

This installation will
require Metric and
SAE wrenches.

Stop, Base, Sprocket, Tightener,
Chain & Hardware Kits

Cover Hardware

Hydraulic Motor and Chute Hardware

4 – ¼ x 5/8 Button Head with washers for chute to sprocket attachment.

3 – ¼-28 x 5/8 Tapered Head Screw for Hydraulic Motor to Base Plate

2) Once you have done an inventory of parts, remove the stock John Deere chute and cable assembly as shown below.

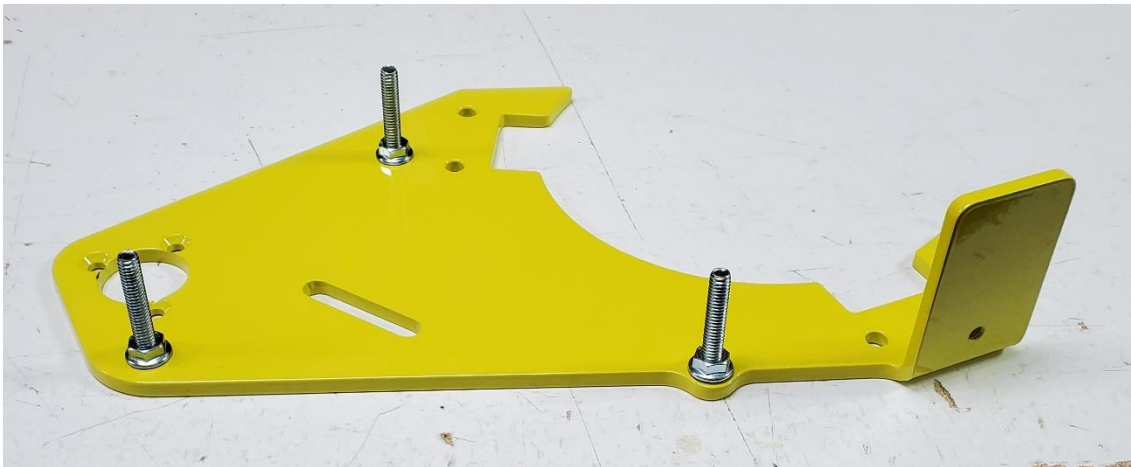

3) Please view the video at

<https://www.dropbox.com/s/imy2896arjm68bu/Snowblower%20Chute%20Rotator.mp4?dl=0> before proceeding for installation instructions and tips. Or go to deckdolly.com and look for the Support Page and you will find the video there as well.

Note: The powder coating may make things tight at first. You can shim the retainer clips with washers if need be until parts wear in. A half link for the chain is included if you need a little extra length.

4) Below are various pictures to aid in installation.
